INVISION SKYRAG 500 = SUPER POWER 1500mW B-Stock

Šifra: 3708
Kategorija prozivoda: Laseri
Proizvođač: INVISION

Cena: 436.920,00 rsd

Technic Parameter SKYRAG 500 is a professional high power laser show system. laser source is created by the semiconductor Laser Diode, which has double temperature control, it has the characteristic of long life, high and steady performance, and conforms with the ILDA! standard; It has powerful functions catering for the stage need, matching the laser show controller(PHOENIX or PANGOLIN) , and high speed (>40kpps) scanner, guarantee the power, and make an powerful and fantastic effect! Power: AC100V-240V50Hz-60Hz

Color: Green + Blue = CYAN

Power: 1500mW

Rating Power: 160W

Modulation: TTL/Analog modulation signal Frequency 0~20KHz

System Port: DMX512 input and output port ILDA DB standard port(switch Automatically)Interlock Emergency switching port

Scan System: high speed scanner >/30/40KHz scan angle:±20 degree control and protection if the image size is too small, the resistance is too large and/or the temperature or power is too high.

Control Mode: iinside SCM program control 128pcs Graphics Standard DMX512 signal Control Chosen the Professional laser Controller connecting ILDA to control

Control Function: Adjust the X axis, Y axis to adjust the size of the graphic and set the data of the graphic Added security design of long-distance laser emergency remote switching Demo Effect: Blanking rotating zoom retroflexion moving strobe 3D etc, used for words, Cartoon, and beam show and laser advertisement .

Work Enviroment: Indoor

Workplace: DISCO HIGH bar Pub Night Club TV Station Opera House advertisement With the security design of long-distance laser emergency switching

Size: SKYRAG-500 Laser 610X380X250mm Flight Case 890X460X430mm(length x width x height)

Weight: Net 19.5kg
Gross 32.5kg
