Professional dynamic large-diaphragm microphone (hypercardioid) for drums and percussion

The TG D70d dynamic large-diaphragm microphone is exceptionally reliable for the transmission of sound from low-frequency instruments – the best friend of every bass drum, djembe and bass amplifier.

Despite its bulky appearance, it can be easily positioned in the resonant head, even in bass drums with very tiny holes. The mass-reduced special membrane delivers exceptional impulse fidelity and the hypercardioid polar pattern ensures excellent feedback reduction. For each switch a specially equalised frequency response curve can be set, which delivers brilliant sound even without making complicated settings on the mixing console; or a linear frequency response curve can be set, which transmits the natural bass drum sound which can then be acoustically tuned via the mixing console.

Sound Channeling Technology:

Special sound geometry behind the diaphragm with high-tech acoustic fabric

Expanded resonance space for exceptionally powerful sound

2-stage treble

Special sound holes for a frequency-independent polar pattern

Technical Data

Price category	Professional
Transducer type	Moving coil (dynamic)
Polar pattern/microphone	Hypercardioid
Microphone frequency response	30 - 18,000 Hz
Dimensions	Length: 128.5 mm; Shaft diameter: 23/25 mm; Head diameter: 56 mm
Net weight without packaging	423 g
