The APart CM1008 2-way built-in loudspeaker can be used with a standard HiFi or professional amplifier. It provides you with a crystal clear HiFi Sound that covers the complete frequency band.

The loudspeaker has an 8" enforced woofer and 1" tweeter. It makes the CM1008 very suitable for the distribution of music at a higher volume level.

The housing is made of high quality ABS. The woofer is made out of polypropylene, what makes it moisture-proof. The loudspeaker is easy to install, due to its simple, quick mounting system (3 screws which are hidden behind the loudspeaker grill, what gives the loudspeaker a modern and striking design).

The CM1008 is standard available in white color RAL 9010. From 12 pieces on, the loudspeakers can be painted optionally in any other RAL color (Ref; PAINT-CM).
