The APart CMX20T 2-way built-in loudspeaker has an exceptional high quality and very good bass response. It can be used as a 16 Ohm or 100 Volt loudspeaker. In 16 Ohm use, you can connect up to 4 loudspeakers in parallel on each channel of a standard 4 Ohm amplifier. For 100 Volt use, the CMX20T is equipped with a high-quality 20 watt 100 Volt transformer with several power tapings.

The loudspeaker has an 8" enforced polypropylen woofer and 1" tweeter. Due to this enforced woofer, the loudspeaker has a very low distortion! It makes the CMX20T very suitable for the distribution of microphone calls and backgroundmusic at a higher volume level.

The housing is made of high quality ABS. The woofer is made out of enforced polypropylen with a rubber edge, what makes it moisture-proof.

The loudspeaker is easy to install, due to its simple, quick mounting system (3 screws which are hidden behind the loudspeaker grill, which gives the loudspeaker a modern and striking design).

The standard colour is white. From 12 pieces on, the loudspeakers can be painted optionally in any other RAL colour (Ref; PAINT-CM).
