Both channels have a program and priority input with independent bass and treble tone control that guarantees an excellent sound experience, even in tough acoustical conditions. The emergency priority input can be activated by contact closure to override the program or music input.

The PA2240BP operates on 230V AC and 24V DC, what makes him excel other power amplifiers. In this way the unit can easily be used in evacuation systems compliant to the EN60849 regulation. As all the controls of the PA2240BP are located at the back panel, changes of the amplifier's settings by unauthorised or unqualified people will most likely be prevented.

As reliability is extremely important in the install and contractor audio market, this multifunctional PA2240BP will definitely be your favourite constant voltage power amplifier.
