

## ELEKTRON Digitone Keys - Sintisajzer

Šifra: 13623  
Kategorija proizvoda: Sintisajzeri  
Proizvođač: ELEKTRON

**Cena: 123.000,00 rsd**

**voice polyphonic  
digital synthesizer**

## Restrictions are for the dreamless

With this ready-to-go performance machine, curiosity is all you need. Wield the Digitone's powerful sound engine with even more control with intuitive sound crafting, 37 keys, 8 voice polyphony, mod and pitch wheels, dedicated outputs per track, and brand new customizable controls. Multimap lets you configure and assign individual sounds per region, triggering sounds or patterns with the tap of a key, while the ability to use portamento and arpeggio flourishes with the freedom of three octaves. Twist through the looking glass and back with the flick of a wrist.

## Sculpt your sound

With the Digitone's powerful and easy to use FM engine you have Digitone dynamism in keyboard form. A variety of dedicated features put the power at your fingertips. Get maximum control out of the machine with eight new assignable knobs. Choose the function you want for each knob to tailor your Digitone Keys, and then let loose. The freedom to switch between tempestuous and serene soundscapes in an instant is laid out in front of you. In an Elektron first, the Digitone Keys helps you liberate your live show with a flexible mod and pitch wheel setup, allowing you to warp your sound to another world with multiple modulations.

## Get connected

With separate outputs for each track, connecting to external effects mixers and pedals, audio interfaces, and modulation sources is easier than ever before. Pinpoint single Digitone Keys tracks to process independently from the rest of your sound.
