

QED XT40i SPEAKER CABLE 50M

Šifra: 13738

Kategorija proizvoda: Hi-Fi kablovi na metar

Proizvođač: QED

Cena: **1.560,00** rsd

This pure oxygen-free copper cable uses an evolution of QED's established X-Tube technology to guarantee superb timing and stereo imaging, and adds the brand new and highly innovative Air Gap dielectric to bring unheard-of rhythmic accuracy and musicality to a cable of this modest price. Very low DC resistance adds unrivalled frequency response to XT40i's already potent audio capability. The result is a cable that advances on the class-leading standards set by its predecessor.

Conductor Area of 4 mm²

X-Tube technology to guarantee superb timing and stereo imaging

Air Gap Dielectric Properties

99.999% Oxygen-Free Copper

Air Gap Dielectric

Air Gap Dielectric

By increasing the separation of the conductors inside the cable, and therefore the amount of air between them, QED has created a low-loss Air Gap dielectric. This technology halves the dissipation and capacitance characteristics of the cable, and results in numerous audible

improvements - particularly where timing and rhythmic accuracy are concerned. Despite this increased separation, though, XT40i retains the sort of cross-sectional area that makes it ideal for long cable runs.

X-Tube Technology

Image not found or type unknown

X-Tube Technology

Forming the cable conductors into a tube-like shape around a hollow insulating rod in the centre of the cable equalises current densities, delivers very low inductance and presents a consistent, even load to an amplifier. The result is a cable that retains more of the finest musical details, that handles rhythms and tempos in the most natural and musically satisfying way, and that outperforms rival designs costing far more.
