

## IK Multimedia iRig 2

Šifra: 14164  
Kategorija proizvoda: USB Zvučne kartice  
Proizvođač: IK MULTIMEDIA

Cena: **5.400,00** rsd

Now everyone can plug in their guitar, bass or other instrument and enjoy killer tone on their iPhone, iPad, iPod touch or Mac — with the release of iRig 2, the world's most popular guitar interface is now better than ever before.

Plug and play simplicity on every device

If you loved iRig's versatility, you'll love iRig 2's new adjustable gain dial, which works with its built-in 1/8" TRRS output connector to give you a true plug-and-play experience with your iPhone, iPad, iPod touch or Mac.

Volume levels vary from instrument to instrument and from device to device. And while the original iRig provided superior sound, it was limited in that you were unable to customize the input gain level to your particular setup. With iRig 2, you get an input gain dial that gives you the power to ensure high-quality sound in every situation. This means that you'll be able to perform at your best no matter whether you're connecting a wailing 3 humbucker electric guitar or a jazzy archtop to your iPhone.

Likewise, its 1/4" instrument input works with your guitar, bass or any line-level instrument. Just plug into it like you would into a stompbox or amplifier. It's as simple as that.

A Swiss Army knife for sound

Want to take it to the stage? iRig 2's new 1/4" output jack lets you use iRig 2 with an amplifier as a part of your live rig without the use of an adaptor.

This opens up a whole world of opportunities when paired with AmpliTube for iOS, IK's powerful guitar and bass multi-effects processor. It provides you with a vast library of meticulously modeled virtual stompbox effects, amplifiers and other gear that you can use as a part of your physical rig when you're jamming with friends, at a practice session, in the recording studio or performing live. Or, if you want to be discreet, plug your headphones into the included 1/8" headphone output.

Even better is that iRig 2 features a switch that lets you select between a processed signal and a clean "thru" input signal. This means you can also use your mobile device as a tuner, recorder or other tool while preserving the purity of a 100% analog signal path.

iRig 2 is there to help you make your practice and performance sessions as easy as possible. It comes with a microphone stand mount and Velcro strip that allow you to easily attach it for performance alongside other convenient tools like IK's iKlip range of mic supports for all sizes of smartphones and tablets.

Features

The sequel to the best-selling iRig interface

1/4" instrument input for use with guitar, bass and other line instruments

1/4" amplifier output for use with an external amplifier without an adaptor

1/8" headphone output

Compact and lightweight design

Selectable dual-mode switch: FX and THRU

Input gain thumbwheel for easy signal control

Comes with microphone stand Velcro strip

Comes with AmpliTube FREE for iOS (free download on the App Store)

iRig HD 2

A digital rig with physical presence

With iRig 2, you'll be able to enjoy AmpliTube for iOS (the #1 app for guitar players). It's ready to go right out of the box. It comes with a powerful cross-platform suite of apps and software that includes free versions of AmpliTube for iOS and AmpliTube for Mac/PC.

To use, just download your preferred version for iOS from the App Store. Then plug your guitar or bass into iRig 2, plug your amplifier or headphones into your device and launch the app.

Immediately you'll see something very familiar: a complete guitar rig. AmpliTube for iOS recreates your entire guitar or bass signal chain in your mobile device and also — depending on your device — provides you with other advanced features, like multi-track recording and editing, high-quality export and more.

And while iRig 2 is the ideal companion to AmpliTube for iOS, it also works with any other recording, processing, tuning or music app.
