IK Multimedia iRig MIDI 2 - Midi interfejs

Šifra: 14180
Kategorija prozivoda: USB Zvučne kartice
Proizvođač: IK MULTIMEDIA

Cena: 7.080,00 rsd

IK Multimedia iRig MIDI 2 - Midi interfejs

Compatibility is key

As we've said, iRig MIDI 2 is the first portable MIDI interface that's compatible with Apple's Lightning cable. This, however, does not come at the expense of universal support. At the center of iRig MIDI 2 is its detachable Mini-DIN connector, which lets you attach a Lightning (included), USB (included), OTG to Mini-DIN (optional), 30-pin (optional) cable depending on the mobile device or computer that you'd like to use. Now you have the flexibility to use MIDI with whatever device you want, anytime, and anywhere.

All-platform

It's all about the connections

iRig MIDI 2 is small, but it can be made even smaller when all of its cables are detached. Because of its Mini-DIN connector, you can remove all cables for extreme portability: Now you have something that you can easily carry with you in your pocket to any gig, performance, studio or jam session. In addition, all iRig MIDI 2 cables are bumper friendly, which means you can connect and start jamming without having to remove your mobile device's protective carrying case.

Mobile MIDI like never before

Like iRig MIDI before it, iRig MIDI 2 features three MIDI ports: IN, OUT and THRU. But this time around the ports are standard-sized and require no adaptor or special cable to use — in fact, you can use any standard MIDI cable you'd like. These ports give you all the control and connectivity that MIDI allows: Use the IN port to use external keyboards and controllers to play your favorite software sound modules and synthesizers. Use the OUT port to control external hardware or synthesizers from your mobile device or computer. And you can use the THRU port to send MIDI data to multiple instruments at once. Monitoring MIDI data with iRig MIDI 2 is easy, it comes with two LEDs that give you an at-a-glance readout of the note data as it passes through the IN and OUT ports.

A whole suite of apps

With iRig MIDI 2, you get more than just a supremely portable MIDI interface; you also get a full suite of music creation apps. As soon as you open the box you'll be ready to go. iOS users get two of IK's most popular mobile apps: SampleTank FREE is a sound and groove workstation filled with hundreds of high-quality instruments and patterns. iGrand Piano FREE is a concert-quality piano app that puts world-class piano sounds at your fingertips. Android users also get a serious sonic suite to start out with that includes Android versions of iGrand Piano FREE and iLectric Piano FREE, IK's powerful high-quality piano apps that deliver amazing acoustic and electric piano sounds. And Mac and PC users can enjoy the full creative power of SampleTank 4 SE, a free version of IK's next generation SampleTank 4 desktop sound workstation. Beyond all that's included, iRig MIDI 2 works with all MIDI-compatible Mac and PC software as well as the entire spectrum of Core MIDI apps for iOS such as GarageBand, Cubasis, Beat Maker 2, Auria and many more.

A legacy of superior Italian design

iRig MIDI 2 has been designed and manufactured in Modena, Italy — a city famous for high-performance Italian industrial design. Like all IK products, it's been through rigorous quality testing to ensure the utmost in dependability — iRig MIDI 2 is housed in a durable rubberized enclosure designed to last performance after performance and gig after gig. IK Multimedia uses only the best components, materials and processes to create solid, smartly manufactured products at an affordable price.

Features

Universal MIDI interface for Lightning iOS devices as well as all prior generations of iPhone, iPad and iPod touch plus Android and Mac/PC

Ultra-portable, pocket-sized form factor that you can take with you anywhere

Detachable bumper-friendly cables for seamless, universal connectivity

Lighting connector and USB cable included, OTG to Mini-DIN and 30-pin cable available separately

Standard-sized MIDI IN, OUT and THRU ports

MIDI IN/OUT LED indicators for at-a-glance monitoring of MIDI data transmission

Draws power from host device instead of a bulky power adaptor

Can be used with Android devices via OTG to Mini-DIN cable

Comes with SampleTank FREE iOS and iGrand Piano FREE apps (download from the App store)

Comes with free Mac/PC virtual instrument: SampleTank 4 SE (download from IK User Area)

Comes with iGrand Piano FREE and iLectric Piano FREE for Android (download from Google Play or Samsung Galaxy Apps)

Elegant and durable rubberized enclosure

Designed and made in Modena, Italy

What's new

This audio processor module is part of T-RackS CS "Custom Shop" Mixing and Mastering Plug-In Collection. With T-RackS CS you can:

Works with Android devices via optional OTG to Mini-DIN cable

Comes with iGrand Piano FREE and iLectric Piano FREE for Android (download from Google Play or Samsung Galaxy Apps)

Comes with free Mac/PC virtual instrument: SampleTank 4 SE (download from IK User Area)
