Handheld vocal microphone

iRig Voice is a fun and colorful handheld vocal microphone that's optimized to deliver stunning audio quality. It's the perfect companion for all your favorite karaoke and music creation apps — simply plug it in to your device and start singing.

iRig Voice features an ergonomic design for hours of comfortable handheld performance, and its shape fits easily into most standard microphone stand clips for stage use. iRig Voice is optimized for vocal frequency range reproduction, it utilizes a compact cardioid pattern for close voice pickup which minimizes feedback when used with speaker systems. It has an on/off slide switch for quick muting of unwanted sound and an oversized strain relief cable end for durable, consistent performance even during high-energy performances.

The colors of sound

iRig Voice comes in 5 stylish colors: Green, Blue, Yellow, Pink and White adding a bright new level of style to any performance. The casing is formed from a strong and durable, yet lightweight, pigmented thermoplastic that won't fade over time. A lightweight durable aluminum mesh cage completely encloses the mic capsule for protection from drops, and a breathable moisture barrier keeps vapor out of the capsule for flawless performance every time.

Features

Handheld vocal microphone delivers professional sound quality

Plug it in

iRig Voice operates through the 3.5mm (1/8") TRRS analog microphone/headphone jack on all devices and provides a built-in headphone through input for connecting headphones for private practice and performance.

EZ Voice

turn any device into a mobile vocal studio

iRig Voice comes with the free EZ Voice companion apps for iPhone, iPad, iPod touch and Android which allows you to sing along with any song in your device library.

Simply import a song into EZ Voice, remove the original vocals in the song by touching the "No Voice" button, add professional effects to your voice like reverb, delay, pitch correction, and sing your heart out.

EZ Voice serves up a suite of nine different professional effects including morph and choir effects, pitch correction, EQ, filter, compression/level, chorus, delay and reverb. You can even record your vocal performances in real time and share them.

iRig Voice also works with many other iOS and Android apps. See a list of compatible apps [here](#).

The microphone for everyone

With iRig Voice, you can be a star thanks to its durable construction, intuitive apps and universal compatibility. iRig Voice is also perfect for capturing broadcast interviews in the field, conference calls, school projects, parties or anywhere vocals need to be captured. And iRig Voice works right out of the box — no additional programs or apps are required to use iRig Voice making it a truly plug-and-play accessory.
