unlimited sounds.

PO-32 is the first pocket operator which allows unlimited sounds. in addition to the 16 preset sounds, you can use sonic charge microtonic vst (sold separately) to craft your own unique sounds and transfer them wirelessly to PO-32 with the built-in microphone, or alternatively by using a cable.

upgraded hardware platform.

PO-32 has a built-in microphone for transferring and receiving data over sound. it also has a removable lock tab for write protection of patterns. the hanger strength is increased for extra durability, and on the backside of unit there are some useful combo reminders.
