The circuitry in the cosMik 10 helps it maintain ultralow self-noise performance (just 5 dBA), so your recordings will be free of the hiss commonly induced by many budget microphones. Being a condenser, the microphone runs on standard 48V phantom power. Getting ready to record is simple; position the cosMik 10 in the included mic holder and tabletop tripod stand, connect it to your preamp or interface with the supplied XLR cable, and engage +48V from your preamp/interface.

1" large-diaphragm condenser capsule

Cardioid polar pattern reduces ambient noise behind the mic

30 Hz to 18 kHz frequency response and 135 dB max SPL; ideal for vocals, acoustic instruments, and speaker cabinets

Ultralow self-noise of just 5 dBA

Stylish and compact body

Operates on 48V phantom power

XLR 3-pin output connector

Includes XLR cable, tabletop stand, mic holder, and foam windscreen
