

## SVS SB-1000PRO Black Ash Aktivni vufer

---

Šifra: 15318

Kategorija proizvoda: Hi-Fi Subwooferi

Proizvođač: SVS

Cena: **89.880,00** rsd

Multiple innovations were deployed in the high-excursion 12-inch SVS SB-1000 Pro driver to ensure massive subwoofer performance from a relatively compact cabinet. Advances to the cone, surround, voice coil, and motor assembly maximize excursion for room-energizing SPLs at the lowest frequencies, with precision and control.

Using reference amplifier technology from the flagship SVS 16-Ultra Series, the SB-1000 Pro features a 325 watts RMS, 820+ watts peak power Sledge STA-325D amplifier with fully discrete MOSFET output. Harnessing the immense power while ensuring tonal accuracy and driver control for more convincing bass effects is a 50 MHz Analog Devices Audio DSP with frequency response precisely tuned for the SB-1000 Pro.

SB-1000 Pro also features the SVS subwoofer smartphone app, the most convenient way to control volume, access multiple DSP functions, and program custom presets. Adjust crossover frequencies, a three-band parametric EQ, polarity, room gain and more, all from your favorite seat.

### **Rear Panel Intelligent Control Interface (ICI).**

The rear-panel SVS Intelligent Control Interface (ICI) provides control options and connections for the subwoofer's most critical functions.

### **Acoustically Inert and Rigidly Braced Ported Cabinet Design.**

Understated yet stylish, the acoustically optimized sealed cabinet features extra-thick MDF front baffle and rigid internal bracing to create a resonance-free environment. Compact enough to fit in nearly any room or system, it serves as a blank canvas for uncompromised subwoofer performance.

### **SB-1000 Pro Smartphone App - Easiest way ever to manage subwoofer DSP and control.**

The most convenient way ever to control volume, access multiple DSP functions, and program custom presets for one-touch tuning optimized for music, movies, gaming, and more. Adjust crossover frequencies, dial-in the three-band parametric EQ, polarity, room gain and more, all from your favourite seat.

### **12-inch SVS High-Excursion Driver - Room-shaking bass with subtlety and refinement.**

Maximizing every available square-inch of surface area, SVS packed a high-excursion 12-inch driver and dual ferrite motor assembly into an acoustically inert, 13-inch cabinet. Thermal management is critical when dealing with such a powerful amplifier and motor in a relatively compact sealed cabinet. SVS engineered a vented pole piece and efficient high-power voice coil to keep the SB-1000 Pro subwoofer cool without impacting performance.

## Sledge STA-325D Amplifier - Effortless power with sophisticated control.

Conservatively rated at 325 watts RMS, 820+ watts peak power, the Sledge STA-325D amplifier maximizes the full potential of the 12-inch driver with effortless power and precise control. The innovative design combines the efficiency of a Class D amplifier with the ability to move colossal amounts of current through the fully discrete MOSFETs for outstanding real-world subwoofer performance at all drive levels, in any room, allows easy integration with any home theatre or stereo speaker system.
