QED SAXTUSPEAKERICABLE 3M

OED SAXT SPEAKER CABLE 3M

Šifra: 15411

Kategorija prozivoda: Hi-Fi Analogni kablovi

Proizvođač: QED

Cena: 16.680,00 rsd

Silver Anniversary-XT has been specifically designed as the natural replacement for the multi-award winning QED Silver Anniversary speaker cable.

Designed with performance in mind, the Silver Anniversary-XT speaker cable boasts all of the characteristics associated with Silver Anniversary but with the added enhancement of the Aircore technology found in the prestigious X-Tube series. X-TUBE with Aircore technology exhibits much lower self-inductance. The use of an innovative Polyethylene aircore enables a reduction in loop inductance to levels only usually achievable by using more costly and difficult to terminate cables.

Silver plated 99.99% OFC Conductors
Compressible Teflon Aircore for ease of termination
Low resistance, low capacitance and low inductance
Easy strip Polyethylene outer jacket
Cross-sectional area 1.50mm²

Kradubet Technologyun How It Works

X-Tube Technology -How It Works

the big problems as cable conductor size increases, is how to keep the inductance low.

This is vital to

One of

reduce cable losses

> and prevent

inaccuracies

in the

signal

transfer

process,

(i.e.

distortion).

The

normal

way to

do this

is to use

а

number

of

individually

insulated

conductors

within

the

cable

construction.

This

11115

method

is utilised

to great

effect in

the

design

of our

Genesis

Silver

Spiral

loudspeaker

cables.

However,

this

results

in a

product

that has

a very

high

quality

sound

performance,

but is

expensive

to

manufacture

and can

be

difficult

to

terminate.

To take advantage of this design

ethos,

but in a more

conventional

format,

X-TUBE

forms

the

conductor

in the

shape of a

tube

with an

inner

Aircore.

This has

the

same

effect

as using

multiple

insulated

conductors

and

ensures

that

high

frequencies

are

transmitted

cleanly,

with the

added

benefit

of ease

of

termination.

This

unique

tubular

conductor

geometry

also

provides

lower

flux

density

within

the

conductors,

which

gives

improved

transparency

to the

sound.

X-Tube - The Signal

Image not found or type unknown

X-Tube -

The

Signal

At low

frequencies

both X-

TUBE

and

conventional

stranded/solid

core

speaker

cable

convey

signals

in a

linear way.

This is

11113 13

represented

by the

uniform

green

colour

of the

strands

shown

in the

two

diagrams

above.

Αt

higher

frequencies

X-TUBE

retains

a near-

linear

signal

transfer,

whereas

the

conventional

stranded/solid

core

cable

fails to

efficiently

conduct

higher

frequencies uniformly

across

the

entire

conductor

area.

The

diagram

shows

excess

current

density

at the

periphery

(designated

in red)

and

rapidly

deteriorating

current

density

(green

through

to

white)

towards

the

centre

of the

conductor.

The

effect of

this is

to

reduce

the

actual

cross-

sectional

area of

the

cable at

15kHz

to less

than

75% of

that at

low

frequencies.

The

result is

induced

distortion

and a

compromise

in the

performance

of the

cable.

Wire gauge	16 AWG
Unique	
SPOFC	5 x 16 x
triple	0.1mm
braid	
Jacket OD	3.90mm
Cross- sectional	1.50mm²
area	
Loop	0.021
resistance	Ω/m
Inductance	0.47
	μH/m
Dissipation factor	0.0006
