SVS Soundpath TRI-Band Bluetooth adapter

Šifra: 15564
Kategorija prozivoda: Ostalo
Proizvođač: SVS

Cena: 25.080,00 rsd

Eliminate Cable Clutter and Expand Subwoofer Placement Options

Subwoofers are often the largest component in any audio or home theater system so placement can be a challenge. The SoundPath Wireless Audio Adapter adds wireless connectivity giving you more subwoofer placement options and decreasing cable clutter without sacrificing performance.

Full-Range Wireless Connectivity

The rated frequency response for transmission is 6 Hz to 22,000 Hz +/-1 dB, so the adapter also unlocks wireless connectivity for a stereo zone of loudspeakers, powered home theater surround sound speakers, amplifiers and more at CD-quality with ultra-low latency (14 milliseconds) within the 2.4GHz frequency band.

Quick and Easy Installation

Simply connect the transmitter to an AV receiver, TV or other audio source via RCA interconnect; connect the receiver to a subwoofer, powered speaker or amplifier; pair the two devices, and the SoundPath Wireless Audio Adapter sends a 16-bit/48KHz signal with no cables or wires required. Cable clutter and placement issues are a thing of the past! For added versatility, up to three adapters can be paired to create a multi-room distributed audio system.

Which SVS SoundPath Wireless Audio Adapter is right for me?

For the vast majority of users, the standard SVS SoundPath Wireless Audio Adapter works flawlessly to wirelessly connect your subwoofers, powered speakers, or other devices.

There are a few scenarios where the SVS SoundPath Tri-Band Wireless Audio Adapter is a better option in your home theater or audio system.

- When multiple wireless devices (microwaves, cordless phones, Bluetooth devices, etc) are all operating in close proximity.
- When you’ve experienced interference in the past from routers, smart appliances, and more.
- When connecting it to another wireless device like SVS Prime Wireless Powered Speakers, which have WiFi and Bluetooth streaming capabilities.
- When the subwoofer or powered speakers are further than 60-feet (line-of-sight) away from the transmitter.

Cene su informativnog karaktera. Prodavac ne odgovara za tačnost cena iskazanih na sajtu, zadržava pravo izmena cena. Ponudu za ostale artikle, informacije o stanju lagera i aktuelnim cenama možete dobiti na upit. Plaćanje se isključivo vrši virmanski - bezgotovinski.
