WHARFEDALE EVO 4 Stand black

Standing at the height of 616mm, the Wharfedale EVO4 Stands metalwork is laser cut from high-grade stainless steel. This precision design means the stand is solid in stature and the stability is optimised. This considered engineering reduces vibrations and resonance of the speaker's cabinet by effectively isolating the speaker from the floor and surroundings. The ensured result is a massively improved loudspeaker performance.

Not just the perfect match for the EVO4 series, the EVO4 stands are ideal for any smaller footprint speaker thanks to the general design which complements any speaker, in any room, aesthetically and acoustically.

Ideal complement for stand-mount / bookshelf speakers

Purpose designed for small footprint speakers such as the Wharfedale EVO4.1 or EVO4.2
