Each WA-84 features a CineMag USA transformer in its signal path to warm up and enlarge the sound source. Also, included are audiophile components including polystyrene and Wima capacitors and a Fairchild FET, which provide a gorgeous sounding circuit with great signal integrity and a smooth boutique tone, resulting in a creamy-smooth top end and a beefy mid-to-bottom.

Each microphone's cardioid capsule is replaceable and is easily unscrewed from the body. The enclosure features a -10 dB pad to attenuate loud sources, while the gold-plated 3-pin XLR connector ensures a solid connection to a microphone cable (available seperately). The WA-84 offers a frequency response of 20 Hz to 20 kHz and can capture sources with a maximum SPL of 133 dB (with the -10 dB pad engaged). The Warm Audio WA-84 Stereo Pair includes two shockmounts, two microphone clips, two windscreens, and a carrying case.
