

The

audiolab 8300XP Aluminium Silver

Šifra: 16399
Kategorija proizvoda: Pojačala Snage
Proizvođač: Audiolab

Cena: 167.880,00 rsd

8300XP is a solid crisp, clean sound. Styled in Audiolab's authentic redefined aesthetics, a true descendant from a range of amplifiers revered throughout the world for their ability to perform at the highest level.

Exemplary build quality and reliability ensure that this is a power amp for all seasons, its versatility increased by a choice of balanced XLR and single-ended RCA inputs, bi-wire speaker terminals and a pair of 12v trigger inputs. Internal circuit components are of the highest quality, right down to the power and signal wiring, which is made of ultra-pure OCC (Ohno Continuous Cast) copper - all in aid of minimising distortion and maximising sonic clarity.

Thrilling to listen to and utterly dependable, the 8300XP is a genuine audio thoroughbred - the perfect partner for audiolab's 8300CD, or peerless M-DAC range.

Flexibility is further enhanced by the ability to add a second 8300XP and operate in bridged mode, thus increasing the power output to 480W per channel into 8 Ohms. All Audiolab amplifiers are gain-matched, ensuring perfect integration with other Audiolab components.

140 Watts per channel in to 8 Ohms
230 Watts per channel in to 4 Ohms
12v power link
