

CHORD MOJO2 Portable DAC & Headphone Amplifier Black

Šifra: 16424

Kategorija proizvoda: DAC-ovi

Proizvođač: Chord Electronics

Cena: 59.880,00 rsd

"Familiar in form but next-level everywhere else, the Mojo 2 is the The Godfather Part II of DAC sequels"

Mojo 2 features the world's first lossless DSP with advanced EQ controls, so the main contender for the best portable DAC and headphone amp just got better. A new control system makes operation intuitive for new adopters of Mojo, yet familiar for those who already gain the benefits of hi-res audio on the go with the original Mojo. Full compatibility is also supported with the Chord Poly that allows you to go wireless with your audio. Unrivalled performance, class-leading sound and peerless build quality make this a must-have for all audiophiles and music lovers.

World's first lossless DSP

Designed in the UK by Chord Electronic's world-class engineers, the Mojo 2 is the most advanced portable DAC available today. The bestselling, original Mojo is highly coveted by audiophiles as it offered an opportunity to take your hi-res sound on the go so Mojo 2 has been built to impress. It features a world-first in the form of a lossless UHD DSP which has a 104-bit custom DSP core running at 705/768kHz which greatly improves the quality offered by the original model whilst also allowing for greater EQ of your audio, with 18 steps of adjustment per frequency band so you can shape your audio the way you want in unbelievable quality.

USB-C compatible

One of the biggest calls from fans of the original DAC was for an update with USB-C compatibility, well Chord Electronics has delivered. On top of the original connections offered with the optical, coaxial micro USB and headphone outputs, the Mojo 2 now features a USB-C connection but what does this mean for you? Well, now you have the opportunity to connect up to modern devices such as Apple Macbooks and Android smartphones dongle-free!

Chord Electronics Poly

As technology moves on, more and more companies opt for wireless technology and with that, sound quality over wireless gets better making it a viable option for modern audiophiles. Chord Electronics has the perfect product for enhancing your experience with the option of taking Mojo 2 wireless. Being Poly compatible means those who already have the original Mojo with Poly and want to go for the improved performance can dive straight in and those who are new to Mojo can open their doors to hi-fi wireless with the perfect accessory.

Features

FPGA-based portable DAC/headphone amplifier with advanced proprietary technology

World's first lossless UHD DSP with advanced EQ negating any degradation of quality

USB connectivity for use with new android phones and Apple MacBooks

Twin headphone outputs allow for dual listening or headphone comparison

Chord Poly, compatible for wireless streaming

Improved battery life with enhanced cooling and efficiency

4e Pulse Array DAC changes eliminate the need for coupling capacitors

40 DSP cores for better transparency and lower noise

The mute function allows for quick pausing of music

Button lock prevents accidental pocket operation

Robust CNC-milled aircraft-grade aluminium chassis ensure long life

Output power @ 1 kHz/300 ohms	90 mW
Output power @ 1 kHz/30 ohms	600 mW
Output impedance	0.06 ohms
Dynamic range	125 dB
THD @ 2.5 V/300 ohms	0.0003
Connectivity	<p>Five digital inputs: coax, dual-data coax, optical, Micro-USB and (new) USB-C</p> <p>Two 3.5 mm headphone outputs for shared listening/headphone comparison</p> <p>Wireless-ready for the Poly streamer/server</p>
Dimensions (L x W x H)	83 x 63 x 23mm
Weight	185g
Product code	CHD-MOJO2-BLK
