EM-91CU vs EM-91CU+

U poređenju sa originalnim EM-91CU mikrofonom, model "+" nudi nekoliko ključnih razlika. Ugrađeni 3.5-milimetarski izlaz za slušalice za monitoring u realnom vremenu. "Onboard" mute dugme za 'seckanje' na delove. Podrška za sampling visoke rezolucije, do 96 kHz.

Plug-and-Play sa vašim uređajem

Startujte odmah, obzirom da ovaj mikrofon funkcioniše direktno sa vašim kompjuterom. Nije potrebno odvojeno pretpojačalo ili interfejs.

Kardioidni polarni patern za netretirane prostore

Mikrofon koristi direktan kardioidni polarni patern za minimalizovanje zvuka van ose. Ovaj polarni patern prirodno, i efektno - smanjuje tonove iz prostora i koncentriše se na ono što je direktno ispred mikrofona, tako da će svi jasno čuti vaš glas (ili glas sagovornika).

Studijski kvalitet audio snimaka

Mikrofon snima zvuk na 24-bita / 48 kHz ili 16-bita / 96 kHz, dajući studijski kvalitet vašim produkcijama/projektima.
