Cena: 28.200,00 rsd

balanced XLR inputs, as well as individual dip switches for 15V of phantom power. The stereo effects loop features a level knob and in/out switch on the front panel. The main output of the MX622BT features balanced 1/4" TRS jacks for clean sound and a master-level knob to control the overall loudness of your audio sources.

The MX622BT fits into a standard 19" rack, great for installed sound systems in bars, restaurants, conference rooms, and any location where multiple microphones, stereo line-level signals, and Bluetooth audio need to be mixed together.

MX622BT Highlights

- Three balanced XLR inputs, switchable between mic and line-level
- Three stereo RCA inputs with separate level controls
- Bluetooth streaming at a range up to 164'
- Level control and clip indicators
- Selectable 15V phantom power for mic channels
- Balanced 1/4" TRS L/R main output jacks with master level control
- Two-band master EQ (treble and bass)
- Separate stereo-record outputs
- Effects loop with independent level control
