Šifra: 17120
Kategorija proizvoda: Procesori
Proizvođač: IK MULTIMEDIA

Cena: **46.200,00** rsd

High-end design for pristine tone

With 24-bit, 192 kHz processing, massively wide 5 Hz-24 kHz response, and 123 dB of dynamic range, TONEX Pedal ensures your instrument's tone is as good as you've ever heard it even before it hits TONEX's incredible modeling.

TONEX's groundbreaking technology lets you model everything from a single pedal to a full-pedal, amp-and-cab rig. TONEX Pedal goes even further, giving you the tools you need to shape your sound live on stage.

AMP / RIG: load up to 150 Tone Model presets to use any time. You can load any combination of pedal, amp and whole-rig models.

VIR CABINET: use IK's award-winning multiple impulse response VIR™ cabinet and mic simulation to dial in the perfect cab tone for any situation.

IR LOADER: load any custom IR you like to explore combinations of Tone Models and your own impulse responses.

EFFECTS: TONEX Pedal includes a noise gate, parametric EQ, compressor, and 5 stereo reverbs derived from AmpliTube X-SPACE pedal.

It's all the tone-shaping options you need in a single pedal. And you can save up to 150 presets, organized within 50 banks of 3 preset slots each, giving you endless tones from a single portable rig.

Tour-ready design and features

Designed and crafted in Italy, TONEX Pedal features a compact chassis made from anodized aluminum that can withstand years of tour abuse.

With full MIDI in/out, you can connect high-end FX pedals like our [X-GEAR](#) line for a complete programable pedalboard or easily add TONEX Pedal to your touring rack, and use its expression pedal input to add real-time control over any parameter.
