Custom-designed BlueLine speakers deliver clear defined bass

We created our own custom speakers for the ABM series cabinets. The ABM-410H houses four 10" BlueLine series speakers plus a switchable (Hi, Low or off) horn tweeter to give complete control over the high end. These speakers deliver the power, transparency and deep low end you need without giving up the mid attack and high end you need for modern bass tones. No matter what type of gig you have, the ABM-410H is ready for action.

Bass equipment that's built to last

The ideal combination of function and class, ABM Series cabinets are tour proven night after night by some of the biggest bands in the world. Featuring tough construction and reliable components ABM cabinets will take whatever is thrown at them night after night.

New for EVO IV is the inclusion of integral wheels and a top mounted recessed handle for easy transportation. Take the professional quality of Ashdown ABM with you wherever you go with the ABM-410H bass cabinet.

Ashdown ABM-410H Features:
