

## Mackie DLZ Creator - Digitalna mikseta

Šifra: 17504  
Kategorija proizvoda: Podcast Miksete  
Proizvođač: MACKIE

**Cena: 69.840,00 rsd**

for podcasts, YouTube videos, live streams, and more. The mixer features Mix Agent technology, Onyx80 microphone preamps, and a 10.1" touchscreen that tailors the controls based on your choice of modes (Easy, Enhanced, or Pro).

Mix Agent is a virtual audio assistant that guides you through set up and automates functions for an efficient, user-friendly experience. AutoMix manages levels for up to four microphones, so you and your guests can be heard, even when everyone speaks at the same time. You can also integrate a phone call into your mix via Bluetooth and activate Mix Minus with one tap, so the caller won't hear their voice echo when they speak. More than a podcast mixer or audio interface, the DLZ Creator can record or stream multitrack audio to a computer via USB-C or straight to an SD card for a truly self-contained setup.

### Create on Your Terms

Choose the mode that fits your creative style and needs, and DLZ Creator tailors the display and controls to match.

**Easy Mode:** a no-fuss user interface that's the fastest path to recording your first episode. For those who want to get great results without menu-diving.

**Enhanced Mode:** expanded control over your sound and mix. For those who want some customization without an overwhelming number of options.

**Pro Mode:** total control and fully customizable. For those who know what they want, and how to get it.

Mackie DLZ Creator - Digitalna mikseta  
**Powerhouse Audio Studio for Content Creation**

Recording & Monitoring Flexibility Meets Built-In Smarts

- Connect up to 4 microphones and 3 external devices—including a smartphone—using analog, Bluetooth, or USB
- 4 combo XLR-1/4" inputs can accommodate microphone- or line-level signals
- 2 unbalanced 1/4" inputs and a single stereo 3.5mm jack can be used for analog input sources
- Record or stream to a computer via USB-C or record to an SD card or USB flash drive
- The unit can function as a 14x4 USB-C audio interface to Mac/PC
- Mix Agent is your personal audio assistant, guiding you through set up and setting gain levels
- Automatic Gain sets your input levels for you
- AutoMix manages levels for up to four mics, so everyone can be heard, even when everyone is speaking at the same time
- Using Mix Minus with your Bluetooth-connected smartphone brings a caller into your mix with no audible echo
- Up to 4 guests can monitor the audio via independent 1/4" outputs

Tactile Controls and High-Quality Audio Processing

- 10.1" high-resolution, full-color touch display with anti-glare coating provides a quick and intuitive workflow
- 5 Quick Control knobs provide a variety of easy to access mode-dependent functions, including headphone volumes and parameter controls
- Instantly trigger pre-made samples via dedicated backlit buttons
- Additional backlit buttons are provided for mute, solo, and navigation functions
- Onboard vocal processing helps you sound like a pro with 3-Band Parametric EQ, High-Pass Filter, De-Esser, Compression, and Noise Gate functions.
- Atomizer Reverb and Chronotronic Delay effects are available for additional sound sweetening and or accent effects
