**Slim
Body**

Šifra: 17524
Kategorija proizvoda: Stage Električni Klaviri
Proizvođač: CASIO

Cena: 57.480,00 rsd

Design with a Depth of Just 232 mm Simple but Sleek

Casio's proprietary high-density mounting technology, with miniaturized components and a space-saving internal structure, is key to the slim body of this piano. Two color variations are available: black and red. The bold single-color scheme and minimalist design aesthetic together deliver a simple yet elegant piano experience.

Always on Hand and Ready to Play

The CDP-S series is compact, lightweight and ultimately portable. Because it can be run from either AC power or batteries, you can play it not just however you like but wherever you like, too.

Sound

Natural Timbre Changes for a Rich Palette of Expression

Ten essential tones, including grand pianos and electric pianos, are waiting to be discovered and played. The subtle changes in response to velocity and time on the piano tones have become even more natural, broadening your range of expression.

Touch

Compact Keyboard Mechanism Delivers a Tactile, Piano Touch

The CDP-S series is perfect for a wide range of musical genres. The Scaled Hammer Action Keyboard II, which is an action mechanism with hammer weighting the same as a grand piano, housed in a compact body, allows for a great balance of slim size and responsive touch.

Keys that are Smooth to the Touch

The fine-grained finish on the key surface prevents slippage caused by perspiration, and the keys feel comfortable to the fingertips even during long sessions.

Features to Enhance Your Playing

Compatibility with Three-Pedal Unit

The CDP-S160 is compatible with the fixed three-pedal stand CS-470P and the three-pedal unit SP-34 (both sold separately), suitable for both piano practice and performance. The damper pedal can be depressed lightly to produce a half-dampened sound.

Clearly Labeled Functions to Easily Set Tones and Other Basic Settings

The function notations above the keys make it easy to see which keys to press to change settings such as

tones and tempo.

Metronome

Practice and perform with precision timing.

Various Temperaments for Any Occasion

In addition to standard equal temperament tuning, 16 alternate temperaments (scale tunings) are available.

Duet Mode

In duet mode, the left and right halves of the keyboard are set to the same tonal range. Great for two players, such as a parent and child or a teacher and student, to practice together.

MIDI Recorder

The MIDI recorder feature enables performances to be recorded to the piano's internal memory and played back - helpful during lessons or just for fun.

Expand Your Enjoyment with the CASIO MUSIC SPACE App

Piano Remote Controller

The CDP-S160 can be seamlessly controlled from the free CASIO MUSIC SPACE app for smartphone and tablet. Quickly and easily change settings such as tone, touch response and metronome.

Score Viewer

View PDF musical scores on your device.

Music Player

Change the tempo, change key, repeat sections, and even cancel the melody* of any audio on your smartphone or tablet.

* Melody cancelation may not be possible with all music.
