The "Tribute Starter" series was created to offer all guitar and bass players, especially beginners, the possibility of having an instrument with similar characteristics to guitar and bass models that have made music history. Thanks to the fantastic price/performance ratio, these budget instruments easily satisfy the idea and desire to play a classically designed instrument. The S-300 has a poplar body, maple neck and resin fingerboard. It features three Eko pickups in S-S-S configuration, Volume, 2 Tone controls and a 5-way selector switch. It features a 42mm nut, 650mm scale length, 22-fret fingerboard with 14" radius, and comes with a tremolo arm. The S-300 is available in Black, Cream, Sunburst, Chrome Red and Metallic Blue; for the left-handed version the available colours are Black and Sunburst. The sound, as well as the design, is inspired by stratoid guitars, therefore with a bright and present tone: undoubtedly a very versatile guitar, with which you can play blues, pop, rock, funky music.
