Bridge: Eko Tune-O-Matic style

Tuning Machines: Eko Die Cast

Electronics: Eko Standard pickups - (x2) humbucker

Electronic Controls: 2 Volume, 2 Tone, 3-way toggle switch

Case: Not Included

The 'Tribute Starter' series was created to offer all guitar and bass players, especially beginners, the possibility of having an instrument with similar characteristics to guitar and bass models that have made music history. Thanks to the fantastic price/performance ratio, these budget instruments easily satisfy the idea and desire to play a classically designed instrument. The VL-480 has a poplar body, maple neck and Eko WPC (Wood Polymers Composite) resin fingerboard. It features two Eko pickups in H-H configuration, Volume and Tone controls for each pickup, and a 3-way toggle switch. It features a 42mm nut, 630mm scale length and a 22-fret fingerboard with 14" radius. The VL-480 is available in Black, Honey Burst Flamed, See Thru Blue Quilted, Gold SParkle and Aged Cherry Sunburst Flamed colours. The sound, as well as the design, is inspired by Gibsonian guitars, thus with a rich, powerful tone and easy saturation.
