

Electro Harmonix Q-Tron Plus

Šifra: 18047

Kategorija proizvoda: Pedale

Proizvođač: Electro Harmonix

Cena: **20.280,00** rsd

Circuit: Analog

Bypass: True Bypass

Audio: Mono

Effects Loop: Yes

Power Supply: 24VDC-100mA power adapter included

Dimensions (in): 5.75 x 4.75 x 2.5

Current Draw: 35mA

Year Released: 2008

Same design as the original EHX Q-Tron but with extremely useful Effects Loop and an Attack Response Switch. The Effects Loop gives the musician the ability to place an additional effect, or chain of effects between the EHX Q-Tron Plus's preamp and filter section without changing the envelope drive. This is particularly important with most distortion devices, as most all do not have much of an amplitude envelope. The FX loop will also fire up your creative juices to try all sorts of combinations in the effects loop: try the Micro POG into a Deluxe Memory Man. You can invent all sorts of novel effects. The added Response Switch selects between a slow, smooth, vowel-like attack and the fast, snaked response of the original Q-Tron.

True bypass

Dedicated effects loop allows you to place any effect or pedal board into the loop

FX send and return without changing the envelope drive

Selectable low pass, band pass and high pass filters

Resonant peak control to adjust the filter's Q from subtle to dramatic

Response switch changes the reaction time of envelope follower from fast to slow

Switchable hi or lo frequency sweep ranges

Adjustable gain knob and boost switch

Sweep direction switch for up or down filter sweeps

Power adapter included
