

## Electro Harmonix STRING9 String Ensemble

Šifra: 18056  
Kategorija proizvoda: Pedale  
Proizvođač: Electro Harmonix

**Cena: 27.480,00 rsd**

### Electro Harmonix STRING9 String Ensemble

**Circuit:** Digital  
**Bypass:** Buffered Bypass  
**Audio:** Mono  
**Power Supply:** 9.6VDC-200mA power adapter included  
**Dimensions** (in): 4.75 x 4 x 2.25  
**Current Draw:** 100mA  
**Year Released:** 2022

The polyphonic STRING9 String Ensemble transforms a guitar into nine different string ensembles and string synthesizers while requiring zero modifications, special pickups, or MIDI implementation. It relies on the same technology powering all EHX 9 Series pedals. In a 9 Series first, the STRING9 includes the signature EHX Freeze effect on 3 of the presets to sample and hold notes and chords with infinite sustain.

A rotary switch on the STRING9 allows the player to select the sound of their choice, as follows:

**SYMPHONIC:** Re-creates the sound of a large symphony orchestra and features an octave down effect on the lower range of the guitar for a full sound

**JUNE-O:** Emulates the Juno® analog string synthesizer sound

**PCM:** Sound of a small string section sampled by a vintage PCM keyboard producing a warm vintage string sound

**FLOPPY:** Emulates the sound of an Orchestron® optical disc playback sampler, warble included

**AARP:** Emulates the classic ARP Solina® string synthesizer

**CREWMAN:** Emulates the Crumar Performer® analog string and brass synthesizer; Floyd in a box

**ORCH FREEZE:** Orchestral sound with EHX Freeze effect

**SYNTH FREEZE:** String synthesizer sound with EHX Freeze effect

**VOX FREEZE:** Mellotron® choir and strings sound from the EHX MEL9 with EHX Freeze effect

The pedal is equipped with independent Effect and Dry volume controls so players can precisely tune their mix at the Effects output jack, plus a Dry output jack that always outputs the input signal at unity gain.

Controls 1 and 2 have been designed to adjust specific parameters for each of the nine programs adding usability and flexibility to each sound.

Simulates nine string ensemble and string synthesizer sounds

Tracks impeccably and works on guitar without mods, special pickups or MIDI implementation

Independent Effect and Dry volume knobs let you precisely control your mix at the Effects output

Controls 1 and 2 have been designed to adjust specific parameters for each of the nine programs

Dry output jack outputs the input signal at unity gain

Compact, rugged, easy to use

Power adapter included
