Pioneer DJ is undoubtedly one of the leading companies when it comes to creating DJ equipment. With a plethora of DJ controllers under their belt, they're always pushing forward with inventive products for professional DJs and beginners.

The Pioneer DJ DDJ-REV7 is undoubtedly one of the most outstanding pieces in the modern DJ market, even winning the Reddot 'Best of the Best' 2022 award. The layout of the unit essentially emulates a combination of a professional DJM-S mixer + PLX turntable setup.

Investing in such a high-end piece of kit doesn't come cheap and in our eyes, protecting our assets is essential.

Additionally, with the inclusion of the 3.5-inch LCD screens (and it being a major component of the unit) there is always a risk of it getting damaged and essentially rendering the unit useless.

Because of this, we have designed and custom-moulded a Decksaver cover right here in the UK to perfectly fit the contours of this exciting unit.

We have gone through years of research and development to create the perfect covers to protect your DJ and music gear. Our super durable polycarbonate shell features extreme durability and offers the highest degree of protection.

With our Decksaver cover, you will never have to worry about your Pioneer DJ DDJ-REV1 getting damaged anytime soon!
