Kategorija proizvoda: Hi-Fi Pojačala za Slušalice
Proizvođač: Ifi Audio

Cena: **20.520,00** rsd

Balanced output

With its dedicated outputs, the Zen Can provides your headphones with a dynamic, punchy sound. You can choose between balanced and unbalanced outputs, giving the chance for higher spec headphones with balanced inputs to really shine.

Pump up the bass

Using passive and active components, switchable XBass enhances the bass response. Ideal for bass-light sounding headphones, the XBass setting applies additional bass, while colouring the rest of the sound as little as possible.

Precise headphone pairing, with selectable gain

With four stages of gain control, the Zen Can matches seamlessly with your headphones. By selecting the correct gain, you not only maximise the volume potential but also reduce distortion and maximise the volume control's sensitivity.

Trio of inputs

With three inputs, it's not just your laptop that can feed this headphone amp. Choose from 3.5mm, RCA phono and 4.4mm balanced inputs to connect to your computer, home hi-fi and studio mixer or other source.

Use as a professional-grade pre-amp

It's not just headphones that benefit from this class-leading design. Thanks to its rear-mounted, 4.4mm balanced output, you can also use the Zen Can as a pre-amp with high-end active speakers or home hi-fi. Connect up to your power amp or active speakers and enjoy smooth volume control and three inputs.

Colour: Black

Manufacturer's guarantee: 1 Year

Weight (kg): 0.52

Frequency Response (Hz): 20 - 20,000
