The Vestax DSC-2000 (Dust Cover) is factory original, professional dustproof removable turntable cover designed for the Vestax PDX Series turntables. He is made of toughened polycarbonate glass MFI Iupilon® (Made by Mitsubishi) and is provided with separate mechanical hinges. Dust cover is designed for Vestax turntables PDX-2000 and PDX-3000 Series but also for some models of turntables from BDT Series. A set of two mechanical hinges is included with the DSC-2000 enclosure Vestax VE HK-1 which are intended to be attached to the turntable chassis and into which the cover is then mounted. The cover is provided with embossments that increase its strength against unwanted dents. DSC-2000 very easy to remove. VE HK-1 hinges are attached to the rear side of the chassis turntable. Dust Cover DSC-2000 is slid on their guide segments.

KEY FEATURES:

- professional turntable dust cover with two removable mechanical hinges in accessories
- with designed embossments that increase its strength against unwanted dents
- shaping the cover to allow the turntable to keep the DSL-1 LED lamp
- made of hardened polycarbonate glass MFI Iupilon® Mitsubishi
- optimal working temperature $-20^{\circ}\text{C} \approx +60^{\circ}\text{C}$
- easy assembly and disassembly

TECHNICAL PARAMETERS:

Application PDX-2000 / PDX-3000 Series, BDT Series
Material polycarbonate glass MFI Iupilon® (Mitsubishi)
Hardness M70 / refractive index 1,584
Working temperature span $-20^{\circ}\text{C} \approx +60^{\circ}\text{C}$
Dimension 454 x 365 x 118 mm
Weight 725 g (with HK-1)
Accessories set of two mechanical hinges VE HK-1
