The LED DynaRock Barrel Scanner is a stylish scanner with 46 pieces of high power LED's. The unit has a high light output and is very easy to use in either stand alone modes or via the optional CA-8 controller. The lightweight construction and low power consumption enables this scanner to suit many applications. All functions are controllable by DMX-512 or the scanner works in stand-alone mode with music activation.

Features:

DMX channels: 4

Thousands of pre-programs

Sound activated, Master/Slave and DMX modes
