iSolution technology allows synchronisation of different types of intelligent iSolution fixtures via either a custom-built iLead DMX-512 controller or in stand-alone mode. iLead (Integrated Lighting System) allows fixtures to be linked and work in synchronisation, regardless of type, including iLead-equipped scanners, moving heads, and colour changers. The iLead controller can also remotely set the DMX addresses of the fixtures. All units are also controllable via any universal DMX-512 controller. Conversely, the iLead controller is a universal DMX-512 controller and can be used with non-iSolution fixtures.

Features:

DMX-512 control channel: 7

Setting and addressing: 4 digit blue LED display

LED display with on/off setting function

Data in/out: Locking 3-pin XLR iSolution operation

Consistant DMX configeration enables iShow to be linked with iRock and iMove

DMX address can be set remotely by iLead controller.

No need to calculate the DMX channels of each fixture in the chain

When the DMX signal is off, the lights will switch to master/slave mode automatically
