

IsoAcoustics ISO-PUCK

Šifra: 13315
Kategorija proizvoda: Stalci za Hi-Fi Zvučnike
Proizvođač: IsoAcoustics

Cena: 7.080,00 rsd

The
ISO-
Puck
is a

portable isolating
and instrument amplifiers. Each unit features the same
patented isolation technology as Isoacoustics' L8R series all in a lower-profile compact model.

Multiple Pucks can be used depending on the size of the studio monitor. Each unit is rated for up to 20lbs (9kg). For smaller studio monitors 3 ISO-Pucks can be used, 2 front and 1 back. For heavier monitors, 4 ISO-Pucks or more can be used as required.

The Puck's unique isolating design works best with the ISO logo facing forward, as the isolators are tuned to resist lateral movements resulting in greater clarity and focus.

Units are sold in packs of 2.

IsoAcoustics IsoPucks are a larger diameter puck assembly based upon the award winning Gaia isolation feet.

Iso-Puck isolators incorporate IsoAcoustics patented design technology to provide a high degree of isolation and oscillations to maintain alignment with the listening position. Internal reflections from the hard-supporting surface are eliminated, resulting in greater sound clarity, openness and focus.

Designed with a weight capacity of 9KG per puck, three or more Iso-Pucks can be installed under equipment based on units weight.
