Ventura 5T

Weatherproof, IP65 certified and salt spray tested, marine quality Ventura Series outdoor models can flood your pool, garden or yacht with high quality sound, even in the most extreme atmospheric conditions.

The new Ventura 5T, integrates 70V/100V multi-tap transformers, allowing multiple speakers to be powered simultaneously through one extremely long wire in a distributed line system. This saves on the cost of wiring and labour, making the Ventura 5T ideally suited to any outdoor installation.

Available in black or white finishes, Ventura 5T blends unobtrusively with the décor – and with the slotted mounting bracket, the units are exceptionally easy to install.
