The R-1650-C employs a 6.5-inch polymer-cone woofer and a large motor structure for high sensitivity. A coaxially mounted 1-inch polymer-dome tweeter distributes smooth, clear highs over a wide area.

The speaker's mounting system makes installation a breeze, while its paintable aluminum grille provides added rust protection in moisture-prone areas such as bathrooms, kitchens and saunas.

While the R-1650-C will fit into our latest IK-650-C installation kit, it can also be used in conjunction with the ME-650-C fire-rated enclosure.
