Torq Control Vinyl disk allows you to control audio files in Torq with the same feel and response as real vinyl records. Simply connect a turntable to a suitable audio interface like M-Audio Conectiv, enable external control in Torq, and you'll be able to cue and scratch your music just as if you were using the original records. With incredibly fast response, Torq Control Vinyl disks let you use even the most intricate scratching techniques, and bi-directional positioning ensures that Torq precisely tracks the vinyl for perfect beat-juggling. Disks are sold individually.
