

MARANTZ MM7025 Black Pojačalo snage

Šifra: 12472

Kategorija proizvoda: Pojačala Snage

Proizvođač: Marantz

Cena: **122.280,00** rsd

Marantz je proizvođač i distributer visoko kvalitetne audio opreme. Prvi proizvod je projektovao i napravio Saul B. Marantz u Kew Gardens-u, New York. U to vreme, kompanija je imala veliki uticaj na razvoj Hi-Fi audio-sistema, obraćajući pažnju na svaki detalj pri projektovanju i konstruisanju. Sredinom 1980-ih dok je bio pod rukovods-tvom Philips-a (pionira u CD tehnologiji), Marantz je među prvima pravio CD plejere koji su jako dobro prihvaćeni od strane zadovoljnih potrošača i kritičara. Danas, Marantz nastavlja da pravi komponente koje su u samom vrhu Hi Fi ponude na tržištu. O tome svedoči i Ken Ishiwata bez čije kontrole i finalnog tjuniranja nijedan Marantz proizvod ne može da se pojavi na tržištu. Godine 2002, Denon i Marantz prave (D&M) grupu kojoj se kasnije priključuju i druga zvučna imena iz audio industrije.

Current Feedback unknown

Current Feedback

The Current Feedback amplifier technology fits perfectly with the high requirements set for Super Audio software providing wide-bandwidth, high-speed reproduction. The impedance at the Current Feedback point is limited resulting in a very low phase shift. Marantz receivers and amplifiers equipped with Current Feedback can keep the phase compensation via Negative FeedBack (NFB) to a minimum, resulting in

high through-rate,
excellent transient
response and superb
sonic transparency for the
full bandwidth.

IR Flasher IN

Image not found or type unknown

IR Flasher IN

The IR-Flasher IN is a
standardized connection
to control the AV system
by external IR receivers
independent of the infra
red control format used.
On the IR-Flasher OUT an
IR-Emitter can be
connected to controlled
third brand components.
The third connection link
to this is the IR-Receiver
INPUT which is similar to
the IR-Flasher In, but it
outputs a voltage to
directly feed an external
IR-Receiver eye. Please
check capability per
product in the
specification section.

Customized Components

Image not found or type unknown

Customized Components

On paper an electrical
component might look
excellent but the result
may fall short of the
combined design
expectations. Marantz
selects the appropriate
components for the
specific design
application. In some cases
it's simply not possible to
use standard components
that meet the high
Marantz standards. These
components will then be
specially made for
Marantz in close
cooperation with the
Marantz engineers.

DC Trigger

Image not found or type unknown

DC Trigger

A DC trigger is an
assignable voltage output

which can automatically control for example an electrical projection screen, lowering it when the DVD input is chosen on the receiver.

Power Supply

Image not found or type unknown

Power Supply

Linear drive power supply (LDPS) is Marantz own technology to design a power supply capable to follow all details of an audio signal to reproduce the finest sound quality.

2x 140 Watts (8 ohm) / 2x 170 Watts (6 ohm)
