### Comprehensive Foot Control for Your DAW or Guitar Rig

Take control of your DAW or guitar rig with the Nektar Pacer MIDI Foot Controller. Featuring dedicated color LEDs to show control assignments, Pacer is designed for Nektar DAW integration. It also supports the MCU protocol for use with virtually any DAW, and also supports Pro Tools setup. Guitarists at Sweetwater appreciate its presets for popular guitar devices like the Line 6 Helix, Avid Eleven Rack, Kemper Profiler, and many more. All this packed into a rugged solid steel casing makes the Nektar Pacer MIDI Foot Controller ideal for any studio or stage application.

#### Nektar Pacer MIDI Foot Controller Features:

- MIDI foot controller for DAWs and guitar processors
- 10 programmable buttons, with LED indicators for control assignments
- 24 available presets (Banks A-D, 6 presets each)
- Support for 4 programmable external foot switches
- Support for 2 programmable external expression pedals
- 4 programmable relays for switching channels or effects on amplifiers
- 1 programmable encoder
- Footswitches can send up to 6 messages when activated
- MIDI Out port for external hardware control
- USB class compliant, powered via USB or USB power supply (not included)
