Key Features

Striking floorstanding Speakers with twin 165mm and 22mm precision drivers

The Q 3050i cabinet uses Point-to-Point (P2PTM) bracing techniques to reduce intrusive cabinet vibrations for a purer sound

HPE™ technology eliminates sympathetic resonance within the enclosures by equalising air pressure within the 3050i cabinet

Conventional terminal panel cut-outs have been removed, giving greatly improved structural integrity to the enclosures and new low profile binding posts

Uses a 22mm decoupled High Frequency Driver with wide surround creating a wide even dispersion of stereo
