Twisted Geometry

Brings superior noise immunity to unbalanced audio connections by using a twisted pair for the signal and return paths thus introducing a level of common mode noise rejection not present in conventional cables.

Engineered Plug Image not found or type unknown

Engineered Plug

Precision engineered plug with integrated grip. 24k gold plated RCA connectors firm and low resistance connection. Gold is used because it will not tarnish thus providing a long lasting low contact resistance connection.

Dual Shielding

Dual electro static shielding protects delicate signals against interference from external high voltages over long cable runs. The shield should ideally be connected at the source end, hence the directionality arrows printed on the cable.

99.999% oxygen free copper conductors
