**Provided your system's good enough to make proper use of a cable like this, you won't be disappointed. It's brilliantly detailed, yet avoids the tonal brightness.**

The new cable is a fusion of QED's high end 'Genesis' and 'X-Tube' technologies, combining them into a new miniature format and bringing high end cable philosophies into a mid-prices product for the first time. This breakthrough means 'Revelation' boasts an overall impedance, and a dissipation factor, significantly below that of a conventional speaker cable with the same cross-sectional area.

The result is a speaker cable that exudes breathtaking neutrality, allowing good hi-fi and home cinema equipment to perform at its very best.

The cable is an attractively finished, standard 'figure 8' configuration, with each of its ten 99.999% silver-plated multiple cores visible through a flexible 5.0mm diameter, clear polyethylene outer sheath. Retail packaged cable pair fitted with QED Airloc terminations.

### Specifications

Wire gauge - 16 AWG

Jacket OD - 5.00 mm

**Cross-sectional area - 1.50 mm<sup>2</sup>**

Loop resistance - 0.020  $\Omega$ /m

Capacitance - 35 pF/m

Inductance - 0.52  $\mu$ H/m

Dissipation factor - 0.0009

Recommended for high end bookshelf installations

Lifetime Guarantee
