Pad sekcija je prepuna funkcija i transportnih režima, uključujući play, sync i auto-loop kontrole. Postoje četiri "cue" tačke, a u 'Shift' modu, podesivi su gridovi i dužine lupova na drugom nivou. Trax-Encoder je tu za veoma zgodne kontrole vaše muzičke arhive, i omogućava označavanje i instant-skok na izabranu poziciju u numeru. Ovaj sistem takođe nudi i prefinjenu pretragu arhive - razvrstavanje i traženje po imenu izvođača, pesme, žanru, kao i sređivanje plejlista i preslušavanje željenih traka bez njihovog ubacivanja u deck.

Spotify je potpuno integrisan u djay 2/Pro, za pristup bazi od preko 20 miliona numera, i što je najvažnije - tu je mogućnost miksovanja bilo koje pesme, bez preuzimanja za vaš uređaj, tj. ne morate je imati u digitalnoj arhivi. MIXTOUR kontroler dolazi sa Apple Lightning kablom, Android OTG adapterom/kablom, USB kablom za MAC/PC, i univerzalnim napajanjem.

Note:

Note! Spotify access in djay requires a Spotify Premium subscription. A free, 7-day trial of Spotify Premium is available to all users of djay 2.
