the external mixer mode: with it, it is possible routing two separate stereo channels to an external mixer – this mode will be appreciated by all professional Traktor users. The second mode is called the controller mode: In this case a master ouptut is routed to the sound system and it is possible to connect headphones directly to the interface – this mode is especially appropriate for laptop DJs without further hardware. Both stero channels' volume can be comfortably adjusted via separate controllers. The signal status LEDs allow a visual monitoring so that everything remains in view and under control. Small, professional and always present: Plug&Play.

Technical Data

Minimum system requirements PC:

| Windows XP (SP3), Win7 (32 bit/64 bit) | at least Pentium III / Intel Core Duo, 1 GHz (NO AMD processors recommended!) at least 512 MB RAM |

Minimum system requirements Mac:

| OS X 10.5/10.6 | Intel Core Duo family (only Intel MACs) at least 512 MB RAM |

Dimensions: 80 x 20 x 65 mm

Weight: 85 g

Incl. ASIO driver CD, USB cord

Features
Ultra portable 4-channel DJ audio interface with 24 bit resolution
Hi-speed USB 2.0 with low latency ASIO/CORE Audio drivers
Hi-gain outputs for powerful club sound
2 stereo RCA outputs for use with an external DJ mixer
Stereo 1/4" headphones output for use with software mixer
2 play modes: External mixer mode (2 separate channels can be routed to an external mixer), controller mode (1x master out is routed to the sound system and headphones can be connected directly to the interface)
Volume controls and signal status LEDs for direct, visual monitoring
Separate volume controllers for channels 1 & 2, master & headphones respectively
USB bus powered
Burglar-proof: Kensington lock
Low latency ASIO/Core Audio drivers
Compatible with Mac OS X and Windows XP/Vista/7
